HEAD OFFICE

REGINA, SASK.

HON. A. G. KUZIAK
Minister

S. R. MUIRHEAD

Deputy Minister & General Manager

J. H. PURDY

General Commercial Superintendent

F. G. MacBEAN

Division Commercial Superintendent

T. E. CAVANAGH

Rural Superintendent

General Information**CONDITIONS OF SERVICE**

1. Service is furnished for the use of the subscriber, his agents and employees on his business. Its use must not be extended to other persons. Others desiring the use of a subscriber's telephone should be referred to the nearest public pay station.

2. If telephone service at the residence rate is given, and such service be used for the purpose of a business or profession, or other than for the usual requirements of a residence, the System may charge the business rate for such service. The advertising of a residence telephone number for business purposes shall be considered as bringing a residence service under the business rate.

3. The telephone instrument is first located where the subscriber directs (except that a business telephone cannot be installed where it is accessible to the general public). If moved subsequently, it shall be done by the System at the expense of the subscriber. Where a telephone is to be moved, at least 10 days' notice is required and the subscriber must make out an application for such a move. The instruments and all accessories, together with telephone numbers, remain at all time the property of the System, and the subscriber shall not remove, alter, or make any attachments thereto, nor shall the subscriber upon giving up the telephone enter into any private arrangement with an incoming owner or tenant for the continued use of the telephone. Application should be made to local Agent for service to be discontinued and the new occupant should make application for service and not "take over" a telephone from a retiring subscriber. The subscriber also agrees to compensate the System on demand for any damage, loss or destruction of the System's instruments and accessories, whilst such instruments and accessories are in or upon the premises of the subscriber.

4. Profane or improper language over the lines is forbidden. The service of any subscriber breaking this rule may be immediately discontinued.

5. In case of necessity the System may, without notice, change telephone numbers.

6. Complaints regarding inattention or discourtesy on the part of employees, or of interruption to service, should be made to the Local Agent. If the complaint is not adjusted satisfactorily, notice should be sent to the Saskatchewan Government Telephones, Regina.

7. The attachment or use of any unauthorized electrical or mechanical connection or apparatus with the lines or instruments installed by the System is forbidden.

8. Uninterrupted service is not guaranteed, but all repairs will be made with reasonable despatch.

DIRECTORY NOTICES

9. Subscribers are requested to destroy all previous issues of directories.

10. Each subscriber shall be allowed, without charge, a telephone directory for each initial and extension telephone. Such directories shall remain the property of the System and shall not be defaced or enclosed in any unauthorized additional cover, either by subscriber or other parties.

11. Every precaution is taken to prevent errors or omissions in this directory, but the System assumes no liability whatever for damages caused to subscribers by errors or omissions in the compiling and printing of this directory. Local subscribers should report promptly in writing to the Local Agent errors which may appear in this Directory. Rural subscribers should notify the Secretary of their company of errors, the Secretary in turn notifying the System.

12. To save time, and to avoid needless disturbance of subscribers, always look up telephone numbers in the directory before making a call.

13. The closing date for insertions, changes or corrections in the next issue of this directory is June 1st. The System reserves the right to change this closing date without notice.

14. Call Information for subscribers not listed in this directory.

DIRECTIONS FOR USING THE TELEPHONE**General**

15. To call the operator give a short turn of the crank with the receiver on the hook. After calling remove the receiver from the hook, and when the operator answers give the number of the subscriber's station required, stating the numbers separately, as "four-two-nine." NOT "four hundred and twenty-nine." Do not hang up the receiver until notified by the operator that the line is busy, or until conversation is finished. If the called subscriber fails to answer within a reasonable time, call the operator again and inform her.

RURAL SUBSCRIBERS SHOULD NOTIFY THEIR SECRETARIES OF DIRECTORY CHANGES

Face the transmitter with the mouth half an inch from the mouthpiece, and speak distinctly but not too rapidly.

WHEN YOU HAVE FINISHED CONVERSATION HANG UP THE RECEIVER AND GIVE ONE SHORT RING. THIS SIGNALS THE OPERATOR THAT YOU HAVE FINISHED AND CLEARS THE LINE FOR ANOTHER CALL.

Answer your telephone promptly giving your name, your firm name or the number of the telephone from which you are speaking.

RURAL

16. REMOVE RECEIVER FROM THE HOOK AND LISTEN IN TO ASCERTAIN IF THE LINE IS DISENGAGED. If disengaged replace receiver on the hook and if a subscriber on the same circuit is required ring the code number of that subscriber, 21 should be rung as two long rings and one short. To call the operator keep the receiver on the hook, press the button and give one short ring. If, after connection is established with the central office, it becomes necessary to re-call the operator, hang receiver on the hook and give one short ring without pressing the push button.

WHEN CONVERSATION IS FINISHED REPLACE RECEIVER ON HOOK AND GIVE ONE SHORT RING WITHOUT PRESSING THE PUSH BUTTON.

AUTOMATIC AND COMMON BATTERY MANUAL

17. At those exchanges where the service is automatic or common battery manual—where the receiver is merely removed from the hook to signal central—subscribers should consult the instructions for using the telephone given in front of such exchange listings.

LONG DISTANCE SERVICE

18. In placing a Long Distance call give the details of your call to the "Long Distance Operator" in the following order. The name of the place you are calling followed by the name and telephone number of the person with whom you wish to speak. Give your own name and number last.

Example: "I would like to speak to Regina, Mr. Brown at 5600. This is Reg Black speaking at 485."

19. Long distance rates are quoted for an initial period of three minutes, for overtime beyond the initial period the charge is made by the minute.

20. All long distance charges are made against the telephone from which the call originates, except in those cases where the originating party, before the conversation takes place, requests that the charges be made "Collect," and provided the party called agrees to accept the message "Collect."

21. Complaints regarding unsatisfactory long distance service should be made to the Chief Operator or Local Agent, and if not remedied, should be taken up with the Head Office, Regina.

REQUESTS FOR A REDUCTION IN TOLL CHARGES ON ACCOUNT OF UNSATISFACTORY CONNECTIONS WILL NOT BE ENTERTAINED UNLESS THE COMPLAINT IS LODGED WITH THE LOCAL AGENT OR CHIEF OPERATOR IMMEDIATELY AFTER THE COMPLETION OF SUCH UNSATISFACTORY MESSAGE.

22. If requested, and upon payment of reasonable charges, a messenger will be sent when available to notify a non-subscriber to come to speak on long distance.

ADVERTISING

23. For advertising rates and space in this Directory apply to the General Commercial Superintendent, Head Office, Regina.

IDENTIFICATION OF EMPLOYEES

24. Employees of the Saskatchewan Government Telephones whose duties require them to enter the premises of subscribers or others, are supplied with an identification card bearing the Saskatchewan Coat of Arms, signed by the General Manager. Subscribers and the public are notified to refuse admission to their premises of any person claiming to be a Telephone employee, who cannot produce a proper identification card, and to notify the Telephone Agent at once.

RECORDING TONE

25. Devices for the recording of telephone conversations may be connected to the telephone service only when said connection is made through recorder connector equipment supplies and installed by the System.

The recorder connector equipment automatically produces a distinctive tone repeated at intervals of 15 seconds. Subscribers and others, upon hearing the tone, are thus notified that the conversation is being recorded.

RURAL COMPANIES

Under its rules and regulations the System deals with a rural telephone company as a whole, and not with a rural telephone company's individual subscribers. The subscribers of a rural company should take up matters affecting their service with the secretary of their company.

Directory and Accounts: Any changes in rural listings and correspondence in reference to connecting fees and toll accounts should be addressed to Division Superintendent, 2350 Albert Street, Regina.

Organization Etc.: Requests for information in respect to organization, debentures, taxation, tax levies, construction and reorganization, should be addressed to General Manager of Telephones, 2350 Albert St., Regina, Sask. Attention Superintendent of Rurals.

BE BRIEF, SOMEONE ELSE MAY BE CALLING

TELETYPE SERVICE

An obvious development in telephony. It does for the written word what the telephone does for the spoken.

It combines the speed of the telephone with the permanency of the printed word — the effectiveness of a personal conversation with the accuracy of a written message.

Messages typed on one machine are reproduced INSTANTLY and IDENTICALLY on all machines connected to the circuit. A station selector can be provided so that only the desired station or stations will reproduce the message.

Call your local TELEPHONE OFFICE for further information about:—

**Prompt
Action**

Time is an important factor with all business men. They know the danger of delay. That is why they prefer a Long Distance call to an exchange of letters. The telephone gets action immediately.

PHONE 488 — Melville — DAY or NIGHT

MELVILLE

Directions for Using the Telephone

1. OBTAIN THE CORRECT NUMBER from the telephone directory. If the person or firm desired is not listed, dial 102 and ask the information operator for the number desired.

2. REMOVE THE HANDSET FROM THE CRADLE and listen for the dial tone which is detectable by a steady humming sound and if heard, dial (see paragraph 4) all numbers listed. If the dialled number is busy, which will be indicated by a buzz-buzz tone, place handset on cradle and wait a short time before dialing number again.

3. TO CALL A SUBSCRIBER ON A RURAL LINE CONNECTED TO THE MELVILLE EXCHANGE obtain the correct number from the rural listing section immediately following the local section, or from the information operator and perform the same operation as in (paragraph 2). Dial only the numbers listed.

4. EXAMPLE—To call 2111. Place finger in finger hole 2 and pull dial down until finger touches

finger stop. Remove finger from dial and allow it to go back all the way itself. DO NOT FORCE THE DIAL BACK. Then place finger in finger hole 1 and pull dial down until finger touches finger stop. Repeat the operation twice using number 1 each time, making certain to allow dial to go back before each dialling operation.

5. DO NOT INTERFERE with any moveable part of the telephone while talking as this may cause a disconnection.

6. IF A MISTAKE IS MADE in dialling a number or if the dial is improperly operated the handset must be momentarily placed on the cradle before dialing again. If the connection is accidentally broken the called party should hang up and allow the connection to be re-established by the calling party.

7. THE DIAL TONE is placed on all lines and is for your convenience and service. You are requested to be guided by it.

MISS A. MICHALISKY, Agent
Office—Second

YOUR TELEPHONE IS YOUR BUSINESS — EXPAND IT

BY ADVERTISING IN THIS DIRECTORY

MELVILLE RURAL SUBSCRIBERS (Automatic)

Including Birmingham, Brewer, Cana, Colmer, Duff and Fenwood Villages.

Directions for Using the Telephone

1. OBTAIN THE CORRECT NUMBER from the telephone directory. If the person or firm desired is not listed, dial 102 and ask the information operator for the number desired.

2. TO CALL A SUBSCRIBER ON YOUR OWN LINE, first remove handset from hook and listen to see if your line is busy. If not busy, replace handset on hook and ring with your generator crank.

3. TO CALL A SUBSCRIBER ON ANOTHER RURAL LINE, first remove handset from hook and listen to see if your line is busy. If not busy, push over the latch on handset hook, allowing the hook to go up all the way. Dial (see paragraph 5) all five numbers as listed. If the dialled number is busy, which will be indicated by a buzz-buzz-buzz tone, hang handset on hook and wait a short time before dialling number again.

4. TO CALL A SUBSCRIBER CONNECTED TO THE MELVILLE EXCHANGE perform the same operation as in (paragraph 3). Dial all the numbers listed.

5. EXAMPLE—To call 310r41. Place finger in finger hole 3 and pull dial down until finger touches finger stop. Remove finger from dial and allow it to go back all the way itself. DO NOT FORCE THE DIAL BACK. Then place finger in finger hole 1 and pull dial down until finger touches finger stop. Repeat this operation using each of the numbers 0, 4, and 1, making certain to allow dial to go back before each dialling operation.

6. WHEN YOUR RING IS CALLED, remove handset from the hook and push over latch to allow handset hook to go all the way up which will stop the ringing. Unless the handset hook latch is operated the rings will not be cut off.

Abbreviation—r—ring

YORKTON

Directions for Using the Telephone

1. OBTAIN THE CORRECT NUMBER from the telephone directory. If the person or firm desired is not listed, dial 102 and ask the information operator for the number desired.

2. REMOVE THE HANDSET FROM THE CRADLE and listen for the dial tone which is detectable as a steady humming sound and if heard, dial (see paragraph 4) all numbers listed. If the dialled number is busy, which will be indicated by a buzz-buzz-tone, place handset on cradle and wait a short time before dialling number again.

3. TO CALL A SUBSCRIBER ON A RURAL LINE CONNECTED TO THE YORKTON EXCHANGE obtain the correct number from the rural listing section immediately following the local section, or from the information operator and perform the same operation as in (paragraph 2). Dial only the numbers listed.

4. EXAMPLE—To call 2211. Place finger in finger hole 2 and pull dial down until finger touches

finger stop. Remove finger from dial and allow it to go back all the way itself. DO NOT FORCE THE DIAL BACK. Then place finger in finger hole 2 and pull dial down until finger touches finger stop. Repeat the operation using number 1 twice, making certain to allow dial to go back before each dialling operation.

5. DO NOT INTERFERE with any moveable part of the telephone while talking as this may cause a disconnection.

6. IF A MISTAKE IS MADE in dialling a number or if the dial is improperly operated the handset must be momentarily placed on the cradle before dialling again. If the connection is accidentally broken the called party should hang up and allow the connection to be re-established by the calling party.

7. THE DIAL TONE is placed on all lines and is for your convenience and service. You are requested to be guided by it.

E. H. Handford, District Manager 1234

Office—62 1st Avenue

YORKTON RURAL SUBSCRIBERS (Automatic)

INCLUDING BARBOUR, BARVAS, DUNLEATH, EBENEZER, FONE HILL, GORLITZ, HAMTON, KESSOCK, McKIM, MEHAN, ORCADIA, OTTHON, POLLOCK, ROKEBY, STURDEE, TONKIN, WILLOWBROOK AND YOUNG SIDING VILLAGES.

DIRECTIONS FOR USING THE TELEPHONE

1. OBTAIN THE CORRECT NUMBER from the telephone directory. If the person or firm desired is not listed dial 102 and ask the information operator for the number desired.

2. TO CALL A SUBSCRIBER ON YOUR OWN LINE, first remove the receiver from hook and listen to see if the line is busy. If not busy, replace receiver on hook and ring with your generator crank. When ringing is finished remove receiver from hook and to talk push over the latch on receiver hook allowing it to go up all the way. If the line is busy, you should replace the receiver on the hook and wait a short time before trying again.

3. TO CALL A SUBSCRIBER ON ANOTHER RURAL LINE, first remove receiver from hook and push over the latch on the receiver hook, allowing the hook to go up all the way. Listen for the dial tone, the steady humming sound, and if heard, with the receiver still off dial (see paragraph 5) all five numbers as listed. If the dialled number is busy, which will be indicated by a buzz-buzz-buzz tone, or if dial tone is not heard, replace receiver on

hook and wait a short time before dialling number again.

4. TO CALL A SUBSCRIBER CONNECTED TO THE YORKTON EXCHANGE perform the same operation as in (paragraph 3). Dial all the number listed.

5. EXAMPLE — To call 923r11. Place finger in finger hole 9 and pull dial down until finger touches finger stop. Remove finger from dial and allow it to go back all the way itself. DO NOT FORCE THE DIAL BACK. Then place finger in finger hole 2 and pull dial down until finger touches finger stop. Repeat this operation using each of the numbers 3, 1 and 1, making certain to allow dial to go back before each dialling operation.

6. WHEN YOUR RING IS CALLED, remove receiver from hook and push over latch to allow receiver hook to go all the way up which will stop the ringing. Unless the receiver hook is operated the rings will not be cut off.

TELETYPE SERVICE

An obvious development in telephony. It does for the written word what the telephone does for the spoken.

It combines the speed of the telephone with the permanency of the printed word — the effectiveness of a personal conversation with the accuracy of a written message.

Messages typed on one machine are reproduced
INSTANTLY and IDENTICALLY
on all machines connected to the circuit. A station selector can be provided so that only the desired station or stations will reproduce the message.

Call your local TELEPHONE OFFICE for further information about:—
